

COMPOSTABLE

MEDIUM KITCHEN BAGS 24in x 30in 61cm x 76cm

AL-PACK is pleased to introduce our next generation of compostable bags. These bags are made from our own blend of compost film that is manufactured on our new 3 layer extrusion line. This new line was designed specifically for compost films.

- The new film is stronger and has lower slip properties. The bags will stand up better in their containers.
- Semi - Transparent so haulers can spot contamination.
- Made from materials that meet the ASTM D6400 standard and are certified by the Biodegradable Products Institute (BPI) and the Bureau de normalisation du Québec (BNQ).
- Individually printed with the BPI and BNQ logos for easy identification.
- The bags have a high vapor permeability that reduces the chance of mold and makes them ideal for holding organics that may be hot or have high liquid contents.
- Bags convert to Carbon Dioxide and water within weeks of disposal in a compost facility.
